Sebastião Salgado. Amazônia Oct 26 2019 For six years Sebastião Salgado traveled the Brazilian Amazon and photographed the unparalleled beauty of this extraordinary region: the rainforest, the rivers, the mountains, the people who live there--this irreplaceable treasure of humanity in which the immense power of nature is felt like nowhere else on earth.

Playing 1. d4 d5 Mar 24 2022 Nikolaos Ntirlis provides a top-class repertoire for Black after 1.d4 d5 with the Queen's Gambit Declined. This is truly the Rolls Royce of chess openings, having been played with both colors by most World Champions and world-class players for more than a century. In addition to the classical QGD, Ntirlis offers a complete repertoire against the Catalan, London System, Torre and all other significant alternatives from move 2 onwards.

The Veresov Aug 24 2019 International Master Jimmy Liew invites you to join him in a study of his favorite opening. He provides answers to all the key questions and tells you everything you need to know about successfully playing the Veresov.

Opening Repertoire - the Jobava System Dec 21 2021 This book analyses a new dynamic opening system for White.

First Steps: The Colle and London Systems May 26 2022 The Colle and London are opening systems for White starting with 1 d4. They are very popular choices at club level and for two very good reasons: 1. Both openings are easy to learn and understand. 2. White's attacking play is based on solid foundations. In this book, International Master Cyrus Lakdawala examines both openings in detail and provides a highly practical repertoire for White based on a mix of the Colle and the London. All the way through the reader is helped along by numerous notes, tips and exercises. This book tells you everything you need to know before taking your first steps with the Colle and London systems. First Steps is a new opening series and is ideal for improving players who want simple and straightforward explanations. First Steps emphasizes: * the basic principles * the basic strategies

Graph Algorithms Feb 08 2021 Discover how graph algorithms can help you leverage the relationships within your data to develop more intelligent solutions and enhance your machine learning models. You'll learn how graph analytics are uniquely suited to unfold complex structures and reveal difficult-to-find patterns lurking in your data. Whether you are trying to build dynamic network models or forecast real-world behavior, this book illustrates how graph algorithms deliver value—from finding vulnerabilities and bottlenecks to detecting communities and improving machine learning predictions. This practical book walks you through hands-on examples of how to use graph algorithms in Apache Spark and Neo4j—two of the most common choices for graph analytics. Also included: sample code and tips for over 20 practical graph algorithms that cover optimal pathfinding, importance through centrality, and community detection. Learn how graph analytics vary from conventional statistical analysis Understand how classic graph algorithms work, and how they are applied Get guidance on which algorithms to use for different types of questions Explore algorithm examples with working code and sample datasets from Spark and Neo4j See how connected feature extraction can increase machine learning accuracy and precision Walk through creating an ML workflow for link prediction combining Neo4j and Spark

The Dynamic English Dec 29 2019 Grandmaster Tony Kosten concentrates on aggressive treatments of the English - an approach that has brought him great success in tournament play. His book provides everything you need to start attacking with the English Opening, supplying players of the white pieces with a set of weapons that will equip them to challenge any opponent they face. There is an ideal balance of explanation and analysis, and practical examples illustrate the key themes.

LOGICAL CHESS Jun 26 2022 By describing every move of thirty-three tournament games, the author illuminates the inner workings of a master's mind and the basic principles of position play

Harry Potter and the Cursed Child Mar 31 2020 The official playscript of the original West End production of Harry Potter and the Cursed Child. It was always difficult being Harry Potter and it isn't much easier now that he is an overworked employee of the Ministry of Magic, a husband, and father of three school-age children. While Harry grapples with a past that refuses to stay where it belongs, his youngest son Albus must struggle with the weight of a family legacy he never wanted. As past and present fuse ominously, both father and son learn the uncomfortable truth: sometimes, darkness comes from unexpected places. The playscript for Harry Potter and the Cursed Child was originally released as a 'special rehearsal edition' alongside the opening of Jack Thorne's play in London's West End in summer 2016. Based on an original story by J.K. Rowling, John Tiffany and Jack Thorne, the play opened to rapturous reviews from theatregoers and critics alike, while the official playscript became an immediate global bestseller. This revised paperback edition updates the 'special rehearsal edition' with the conclusive and final dialogue from the play, which has subtly changed since its rehearsals, as well as a conversation piece between director John Tiffany and writer Jack Thorne, who share stories and insights about reading playscripts. This edition also includes useful background information including the

Potter family tree and a timeline of events from the wizarding world prior to the beginning of Harry Potter and the Cursed Child.

London Jamaican Feb 20 2022 London Jamaican provides the reader with a new perspective on African descent in London. Based on research carried out in the early 1980s, the author examines the linguistic background of the community, with special emphasis on young people of the first and second British-born generations.

Smerdon's Scandinavian Sep 25 2019 Grandmaster David Smerdon gives the Scandinavian a welcome twist by using it as an all-out attacking weapon. The repertoire he presents is one he has successfully employed at grandmaster level over many years, and the backbone is provided by the razor-sharp Portuguese and Icelandic gambits.

The Penal System Jan 22 2022 Now in its Sixth Edition, this remains the most comprehensive and authoritative book on the penal system, providing students with an incisive, critical account of the punitive, managerial and humanitarian approaches to criminal justice. Fully updated to cover the most recent changes in the Criminal Justice System, the new edition: Outlines contemporary policy debates on sentencing, staffing, youth custody and overcrowding. Explores growing inequalities in the criminal justice system including issues of race, religion, gender and sexuality, with new content on faith, and transgender prisoners. Considers the impact of privatisation on the probation service. Discusses the most recent debates around the parole process, including high-profile cases and attempts at reform. The book is supported by online resources for lecturers and students, including chapter PowerPoints, sample syllabus, summaries of key legislative acts and bills, official reports, a list of recommended further reading for each chapter, and links to important Penal Agencies and Organisations, Law Reform Organisations, and other useful academic sites. Essential reading for students of criminal justice and criminology, studying penology, punishments and the penal system.

The Modernized Reti, Extended Second Edition Feb 29 2020 The Reti opening has been most popular in the most recent years. In his 'Modernized Reti', Adrien shows how this refined opening needs to be handled. With many transpositions into different types of positions, it is one of the richest choices White has when starting the game. If you are looking for a refined, tricky and dynamic way to play as White, Adrien will surely show you the way in his first book for Thinkers Publishing!

The English Opening Jan 28 2020 Mihail Marin completes his opening repertoire for White with 1.c4, the English Opening, by covering 1.c4 c5. The theory is state-of-the-art with many novelties suggested, but most useful of all are Marin's lucid explanations of how to play the resulting positions. Features: A repertoire for White with 1.c4 c5; Written by an award-winning author; A repertoire to last a lifetime.

The System of Professions Dec 09 2020 In The System of Professions Andrew Abbott explores central questions about the role of professions in modern life: Why should there be occupational groups controlling expert knowledge? Where and why did groups such as law and medicine achieve their power? Will professionalism spread throughout the occupational world? While most inquiries in this field study one profession at a time, Abbott here considers the system of professions as a whole. Through comparative and historical study of the professions in nineteenth- and twentieth-century England, France, and America, Abbott builds a general theory of how and why professionals evolve.

Play the London System Aug 29 2022 Cyrus Lakdawala presents a reliable repertoire for White with this popular opening. He reveals all his ideas and explains the typical plans and tactics for both sides.

Starting Out Nov 07 2020 Part of Starting Out series, this book revisits the fundamentals of the Reti, examining the key moves and plans for both sides. It explains the reasoning behind key moves and ideas. It is suitable for improvers, club players and tournament players.

Concentration and Power in the Food System Sep 17 2021 Who controls what we eat? This book reveals how dominant corporations, from the supermarket to the seed industry, exert control over contemporary food systems. It analyzes the strategies these firms are using to reshape society in order to further increase their power, particularly in terms of their bearing upon the more vulnerable sections of society, such as recent immigrants, ethnic minorities and those of lower socioeconomic status. Yet this study also shows that these trends are not inevitable. Opposed by numerous efforts, from microbreweries to seed saving networks, it explores how opposition to this has encouraged even the most powerful firms to make small but positive changes. This revised edition has been updated to reflect recent developments in the food system, as well as the broad political economic forces that shape them. It also examines the rapidly changing technologies, such as Big Data and automation, which have the potential to reinforce, as well as to challenge, the power of the largest firms.

The London System in 12 Practical Lessons Jul 28 2022 The London System is being played by an ever increasing number of players, and it's easy to see why. Against virtually every Black defence after 1.d4 it offers White an easy-to-learn and reliable set of lines. In the process, White has interesting choices between strategic or more aggressive approaches, while avoiding loads of opening theory. Ideal for players who don't have much time to study. Creative elite players such as Alexander Grischuk, Baadur Jobava, Richard Rapport and even World Champion Magnus Carlsen have the London in their repertoire. Following the enormous success of The Agile London System, the book he co-authored in 2016, Oscar de Prado revisits his favourite opening. The general focus is less on theory and has a more practical approach – although he does present recently played games and some important theoretical updates. De Prado avoids long and complicated variations and concentrates on explaining straightforward plans, clear-cut strategies and standard manoeuvres. If you follow De Prado's lessons you are unlikely to face surprises or to emerge from the opening in a worse position, and you will learn to make the right middlegame choices. Studying this book is the most efficient way to acquaint yourself with a flexible chess opening that is easy to learn and hard to counter.

Starting Out: The Colle Apr 12 2021 The Colle is a solid, reliable system of development based on the popular opening move 1 d4. One of its major advantages is that although the system is very easy to learn and play, it leads to exciting middlegame positions where White often launches a violent attack against Black's king. The Colle is a particular favourite amongst club players, but is also seen at grandmaster level; perhaps its most well-known exponents are the former World Championship Candidate Artur Yusupov and the twice World Junior Champion Shakhriyar Mamedyarov. This book is a further addition to Everyman's best-selling Starting Out series, which has been acclaimed for its original approach to tackling chess openings. International Master Richard Palliser examines the fundamentals of the Colle, elaborating on the crucial early moves and

ideas for both sides in a way that is often neglected in other texts. The reader is helped throughout with a plethora of notes, tips and warnings highlighting the vital characteristics of the Colle and of opening play in general. Starting Out: The Colle is a perfect guide for improving players and those new to this opening. Written by a Colle expert Covers everything you need to know after 1 d4 d5 Concentrates on the basic principles of the opening

My Fair Lady Jul 04 2020 Eliza Doolittle is a poor flower-seller in Victorian London who has a very strong London accent. Professor Higgins chooses her for an experiment. He decides to teach her to speak like an upper class lady but things don't happen exactly as he plans ... This wonderful story was first a play called Pygmalion by the famous writer George Bernard Shaw. It was made into a musical, perhaps the best-known of all, and then a film starring Audrey Hepburn.

Cardiology Explained Nov 19 2021 One of the most time-consuming tasks in clinical medicine is seeking the opinions of specialist colleagues. There is a pressure not only to make referrals appropriate but also to summarize the case in the language of the specialist. This book explains basic physiologic and pathophysiologic mechanisms of cardiovascular disease in a straightforward manner, gives guidelines as to when referral is appropriate, and, uniquely, explains what the specialist is likely to do. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that matter.

London 1922 May 14 2021 Historic London 1922 Jos Capablanca was the superstar of chess in 1922 and London was his first serious chess in the 15 months since he had won the championship title from Emanuel Lasker. Capa was the chessplayer whom even non-players could identify. But the tournament signified not only Capa's return to the game, it was also something of a revival of international chess after four years of war and four more of recovery. The new world champion would ease into first place undefeated ahead of future challenger Alexander Alekhine. The young Dutchman Max Euwe was honing his skills that would eventually take him to the top of the chess world. And Richard Reti was about to unveil his Opening of the Future 1.Nf3! London 1922 is important for all these reasons, but it also served as the setting for the creation of the famous London Rules which would govern the way in which prospective challengers to the title would have the right to play the champion. As an added bonus, all fourteen games of the 1921 Lasker-Capablanca have been added to this new 21st century edition, with annotations by Capa himself!

The London System Apr 24 2022

Win with the London System Sep 29 2022 The London System is a perennial favourite of club players, as it is a very sound and solid system with a real practical sting. The authors of this new book seek to maximize this sting in two principal ways. Firstly, by explaining in detail the typical plans for White, they help readers to make the most of their chances, whether they are based on a kingside attack, queenside penetration, central play, or transition to a favourable endgame. Secondly, they advocate some subtle move-orders that limit Black's options, and give White possibilities to change the nature of the game and go straight for the kill if Black responds casually or inappropriately. These move-orders have been tested successfully by co-author Kovacevic at grandmaster level, and much of the analysis presented here is of totally new variations, and is previously unpublished. Covers all responses to 1 d4 against which White can use the London System.

The Killer Dutch Aug 05 2020 Grandmaster Simon Williams has played the Classical Dutch for over twenty years. It remains his favourite opening and has featured in some of his greatest individual results, including a win over World Championship finalist Boris Gelfand. In this book, Williams examines the Classical Dutch in great depth. He also presents a complete repertoire for Black with the Dutch Defence, which is based on his own repertoire he has used successfully at grandmaster level for many years. As well as presenting the latest theory and revealing his new ideas in the key lines, Williams highlights the main tactical and strategic ideas for both sides and covers important issues such as move orders. Each chapter includes a series of tests at the end, so that readers are able to assess how well they have understood the main concepts. This book tells you everything you need to know about successfully playing the Classical Dutch. A Dutch repertoire against 1 d4, 1 c4 and 1 Nf3 Written by a world-renowned Classical Dutch expert Packed with new ideas and critical analysis

Kaufman's New Repertoire for Black and White Jul 24 2019 Seven years after his acclaimed and bestselling The Kaufman Repertoire for Black and White, Grandmaster Larry Kaufman is back with his new repertoire book, covering the entire scope of chess openings for both White and Black, in one volume. Two important developments made this book necessary. Larry Kaufman, who himself routinely plays the lines he advocates to others, discovered that after 1.d4 (the recommendation in his previous book) it became nearly impossible to show a consistent advantage for White, especially against Grunfeld and Nimzo/Ragozin defenses. The other factor was that chess engines have become so much stronger. Larry Kaufman presents a completely new White repertoire with 1.e4 aiming for an objective advantage in the simplest practical manner. You are presented with two options, while you don't have to play the sharpest lines. The Black repertoire has been thoroughly revised and updated, and three new chapters have been added. Kaufman's New Repertoire for Black and White is the first opening book that is primarily based on Monte Carlo search. The highly original analysis has resulted in loads of improvements on existing theory. This is a lucidly explained, ready-to-go and easy-to-digest repertoire with sound, practical lines that do not outdate rapidly and are suitable for masters while perfectly accessible for amateurs.

London Boroughs at 50 Mar 12 2021 It is the year 1965. Mary Quant introduces the miniskirt to society in her shop in Chelsea; the Dalek-style Post Office Tower is opened; and the Beatles play their last ever live UK tour date. Most importantly, on 1 April, a new system of city government is introduced and London's thirty-two boroughs are born, revolutionising the capital into the place we know today. New names had to be chosen, councillors elected and policies formed; these boroughs and the Greater London Council between them took control of housing, roads, planning, schools and social services. Half a century on and, though the GLC was abolished in 1986, the boroughs live on, now working alongside a new metropolitan government headed by mayors Ken Livingstone and, since 2008, Boris Johnson. In London's Boroughs at 50, Tony Travers examines the governing system that developed alongside the growing metropolis and, by identifying the unique path each has taken over the years, tells the fascinating story of how our remarkably diverse boroughs have not only survived, but actively shaped both the city and the lives of its inhabitants in their impressive fifty-year history.

The Agile London System Oct 31 2022 It is not difficult to understand why the London System is such a popular chess opening with club players all over the world. Against virtually every Black defence after 1.d4 it offers White an easy-to-learn and reliable set of lines with interesting choices between strategic or more aggressive approaches, while avoiding tons of opening theory. Lately an increasing number of Grandmasters such as Alexander Grischuk, Gata Kamsky, Baadur Jobava, Richard Rapport and even World Champion Magnus Carlsen have played the London System. In this light it is surprising that so little has been published about this fascinating universal weapon. GM Alfonso Romero and FM Oscar de Prado have now filled this gap. In The Agile London System they present both historical material and recent top-level examples to provide a comprehensive overview. Romero and De Prado explain the typical plans and tactics using illustrative games with clear verbal explanations, and provide lots of tactical and strategic exercises. The authors reveal the secrets behind sharp ideas such as the Barry Attack and the Jobava Attack and have added an exciting chapter on the hyper-aggressive Pereyra Attack, developed by the Argentinean master Manuel Pereyra Puebla.

Down and Out in Paris and London Oct 07 2020

The Killing of Osama Bin Laden Oct 19 2021 Electrifying investigation of White House lies about the assassination of Osama bin Laden In 2011, an elite group of US Navy SEALs stormed an enclosure in the Pakistani city of Abbottabad and killed Osama bin Laden, the man the United States had begun chasing before the devastating attacks of 9/11. The news did much to boost President Obama's first term and played a major part

in his reelection victory of the following year. But much of the story of that night, as presented to the world, was incomplete, or a lie. The evidence of what actually went on remains hidden. At the same time, the full story of the United States' involvement in the Syrian civil war has been kept behind a diplomatic curtain, concealed by doublespeak. It is a policy of obfuscation that has compelled the White House to turn a blind eye to Turkey's involvement in supporting ISIS and its predecessors in Syria. This investigation, which began as a series of essays in the London Review of Books, has ignited a firestorm of controversy in the world media. In his introduction, Hersh asks what will be the legacy of Obama's time in office. Was it an era of "change we can believe in" or a season of lies and compromises that continued George W. Bush's misconceived War on Terror? How did he lose the confidence of the general in charge of America's forces who acted in direct contradiction to the White House? What else do we not know?

Opening Repertoire Jun 22 2019 Cyrus Lakdawala is an International Master, a former National Open and American Open Champion, and a six-time State Champion. He has been teaching chess for over 30 years, and coaches some of the top junior players in the U.S.

Beating 1.d4 Sidelines Jun 14 2021 Most players are comfortable using their favourite defence against 1.d4 followed by c2-c4, but it is not always easy to find an antidote to the many sidelines at White's disposal. From the bodacious Blackmar-Diemer Gambit, to the villainous Veresov, to fiendish fianchetto systems to the treacherous Trompowsky, Black must be ready to meet a whole array of slippery systems, each bringing its own unique dangers and challenges. Grandmaster Repertoire 11 – Beating 1.d4 Sidelines provides a sound and active repertoire against virtually every non-standard opening line at White's disposal after both 1.d4 d5 and 1.d4 Nf6. Where applicable, Avrukh covers each white system after both 2...e6 and 2...g6, making this book suitable for fans of the Nimzo-Indian, King's Indian and Grünfeld defences alike.

My First Chess Opening Repertoire for Black Sep 05 2020 Every chess player needs to decide which openings he or she is going to play. But where do you start? The risk of drowning in the turbulent sea of chess opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. After the success of his volume for White, experienced French chess trainer Vincent Moret now provides a complete, ready-to-go chess opening repertoire for Black. It consists of a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of Grandmasters. He also uses games of young, improving players to highlight the errors they tend to make.

The Modern Scandinavian Jul 16 2021 The Scandinavian Defense is increasingly popular with club and internet players. It is easy to learn because there is relatively little theory and once White has played 1.e4 he cannot avoid Black uncorking the Scandinavian. This book is the long-awaited translation of a German bestseller considered by many to be the best book ever on the Scandinavian. It does not concentrate on theoretical lines but on the structural ideas that govern this opening. Basic strategic themes, how pawn structures dictate plans of attacks, which tactical motifs you can expect in certain typical positions, that is what this book is about. You will learn how to outplay your opponent with solid and relatively easy-to-learn moves.

The Economic Weapon Jan 10 2021 Tracing the history of economic sanctions from the blockades of World War I to the policing of colonial empires and the interwar confrontation with fascism, Nicholas Mulder combines political, economic, legal, and military history to reveal how a coercive wartime tool was adopted as an instrument of peacekeeping by the League of Nations. This timely study casts an overdue light on why sanctions are widely considered a form of war, and why their unintended consequences are so tremendous.

London 2. Bf4 Tactics May 02 2020 London 2.Bf4 gives you an easy system to begin your chess games. This book provides 200 early winning examples for White with a checkmate or a combination to win material. The 200 diagrams come from actual games where White had combinations or checkmates. This companion volume to my London 2.Bf4 Playbook demonstrates tactical ways White can win early in the opening from moves 7 to 22. It is White's move in every diagram with easy thematic wins. London System is a repeatable sound choice that allows you to quickly develop all your minor pieces and castle. It saves you time and energy, but you can't be lazy to win. You need to use your tactical skills. This book gives you typical examples of how that might work in your games. In chess, White has four basic overall opening approaches: 1. Gambits: Aggression without control. Create danger. You will win short crushing games and will lose ugly ones. 2. Main Lines: Aggression with control. Memorize theory. You will learn sharp complicated lines. Hard work pays off. 3. Ultra-Cautious: Control while hiding. Wait for blunders. You will lose with lazy play and only beat weaker players. 4. Systems: Control with tactics. Aim to attack weak points. You will repeat common piece set-ups with a plan to win. Number 4 is our London 2.Bf4 systematic goal. You can do it. Others have paved the road before you. Be prepared!

Win with the Stonewall Dutch Jun 02 2020

Chess Openings For Dummies Aug 17 2021 Improve your chess game the fast and easy way You never get a second chance to make a first impression? especially in the game of chess!
