The Regression Clause of iGen Feb 26 2022 Today the regression clause of iGen comes from a number of elements, including the "lack of cultural capital", because of a kind of human habit to live suspended between a real and virtual world. The forgetfulness of the real body also produces fallout series on mental health up to cause behavioral cognitive disorders. The identity of the human race is aware of mutual recognition among the living, but only individuals who possess the moral sense are able to share and understand this meaning. The identity is constructed through the recognition of the other (Galimberti U., 2007, p. 33). Europe will see more and more prevailing Metissage, but the integration meets a weak resilience in particular by later generations over the years compared to youngsters still in school age. The @generation is the next new nationality, and should be better monitored. Motricity of @generation is now mainly limited to the use of two inches, committed spasmodically, anywhere texting to the Community which corresponds the homeostatic super organism which is the global network. Investing in school sports for a longer time and more awareness promote the bodily kinesthetic intelligence and assess alterations in favour of better physical, mental and moral sense balance.

Vegetative Powers Jul 10 2020 The volume analyzes the natural philosophical accounts and debates concerning the vegetative powers, namely nutrition, growth, and reproduction. While principally focusing on the early modern approaches to the lower functions of the soul, readers will discover the roots of these approaches back to the Ancient times, as the volume highlights the role of three strands that help shape the study of life in the Medieval and early modern natural philosophies. From late antiquity to the early modern period, the vegetative soul and its cognate concepts have played a substantial role in specifying life, living functions, and living bodies, sometimes blurring the line between living and non-living nature, and, at other moments, resulting in a strong restriction of life to a mechanical system of operations and powers. Unearthing the history of the vegetative soul as a shrub of interconnected concepts, the 24 contributions of the volume fill a crucial gap in scholarship, ultimately outlining the importance of vegetal processes of incessant proliferation, generation, and organic growth as the roots of life in natural philosophical interpretations.

Italy and the Potato: A History, 1550-2000 Dec 27 2021 Italy, like the rest of Europe, owes a lot to the 'Columbian exchange'. As a result of this process, in addition to potatoes, Europe acquired maize, tomatoes and most types of beans. All are basic elements of European diet and cookery today. The international importance of the potato today as the world's most cultivated vegetable highlights its place in the Columbian exchange. While the history of the potato in the United States, Ireland, Britain and other parts of northern Europe is quite well known, little is known about the slow rise and eventual fall of the potato in Italy. This book aims to fill that gap, arguing why the potato's 'Italian' history is important. It is both a social and cultural history of the potato in Italy and a history of agriculture in marginal areas. David Gentilcore examines the developing presence of the potato in elite and peasant culture, its place in the difficult mountain environment, in family recipe notebooks and kitchen accounts, in travellers' descriptions, agronomical treatises, cookery books, and in Italian literature.

Problems and progress in land, water and resources rights at the beginning of the third millennium Aug 23 2021 The University of Milan's SHuS (Interdisciplinary Research Centre for Sustainability and Human Security: Co-operation and Governance agendas) offers a collection of high standard contributions and testimonies of good practice analyzing the complex subjects of access to rights and resources worldwide. This to a world looking to the future and projecting its goals of sustainable development. The thirty three contributors took part in the Milan University sessions of the International Conference dedicated to Land, Water and Resources Rights, organized by the Editor under the auspices of the EU-Joint Research Centre Expo 2015 and the City of Milan Scientific Committee for Expo 2015. With no claims to being exhaustive, the multi-disciplinary approach and the inter-disciplinary perspectives adopted to the topics are enforced by suggestions for political and legal approaches that a regional structure like the EU should be adopting to prevent legitimization leading to severe forms of

injustice against communities and individuals. SHuS has chosen open access to this e-book in order to create a seamless connection between scientific communities and the wider civil society. Thus it underscores one of the priorities of the Centre by ensuring the greatest possible impact of much needed multifaceted scientific approaches to society and the problems afflicting it.

Storia della cucina - La cucina medievale Jun 01 2022 Questo testo è frutto di una ricerca su svariati testi di cui è data ampia bibliografia. Contiene una panoramica di grandi cuochie dell'antichità ed in particolare dell'epoca medievale ma con riferimenti anche alla cucina dell'antica Roma e quella Rinascimentale. Si descrive anche l'evoluzione della tavola e delle abitudini alimentari degli antichi con riferimento alle stoviglie ai metodi di cottura e alla profonda differenza fra il mangiare dei poveri e quello dei ricchi per i quali il banchetto era anche una dimostrazione di fasto e di ricchezza. Si descrivono anche alcuni piatti legate a personaggi famosi e la trascrizione di ricette originali più o meno modificate per renderle appetibili alle mutate abitudini culinarie del tempo attuale.

The Flavors of Modernity Oct 13 2020 From Rabelais's celebration of wine to Proust's madeleine and Virginia Woolf's boeuf en daube in *To the Lighthouse*, food has figured prominently in world literature. But perhaps nowhere has it played such a vital role as in the Italian novel. In a book flowing with descriptions of recipes, ingredients, fragrances, country gardens, kitchens, dinner etiquette, and even hunger, Gian-Paolo Biasin examines food images in the modern Italian novel so as to unravel their function and meaning. As a sign for cultural values and social and economic relationships, food becomes a key to appreciating the textual richness of works such as Lampedusa's *The Leopard*, Manzoni's *The Betrothed*, Primo Levi's *Survival in Auschwitz*, and Calvino's *Under the Jaguar Sun*. The importance of the culinary sign in fiction, argues Biasin, is that it embodies the oral relationship between food and language while creating a sense of materiality. Food contributes powerfully to the reality of a text by making a fictional setting seem credible and coherent: a Lombard peasant eats polenta in *The Betrothed*, whereas a Sicilian prince offers a monumental macaroni timbale at a dinner in *The Leopard*. Similarly, Biasin shows how food is used by writers to connote the psychological traits of a character, to construct a story by making the protagonists meet during a meal, and even to call attention to the fictionality of the story with a metanarrative description. Drawing from anthropology, psychoanalysis, sociology, science, and philosophy, the author gives special attention to the metaphoric and symbolic meanings of food. Throughout he blends material culture with observations on thematics and narrativity to enlighten the reader who enjoys the pleasures of the text as much as those of the palate. Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Sex, Gender and Sexuality in Renaissance Italy Dec 15 2020 *Sex, Gender and Sexuality in Renaissance Italy* explores the new directions being taken in the study of sex and gender in Italy from 1300 to 1700 and highlights the impact that recent scholarship has had in revealing innovative ways of approaching this subject. In this interdisciplinary volume, twelve scholars of history, literature, art history, and philosophy use a variety of both textual and visual sources to examine themes such as gender identities and dynamics, sexual transgression and sexual identities in leading Renaissance cities. It is divided into three sections, which work together to provide an overview of the influence of sex and gender in all aspects of Renaissance society from politics and religion to literature and art. Part I: *Sex, Order, and Disorder* deals with issues of law, religion, and violence in marital relationships; Part II: *Sense and Sensuality in Sex and Gender* considers gender in relation to the senses and emotions; and Part III: *Visualizing Sexuality in Word and Image* investigates gender, sexuality, and erotica in art and literature. Bringing to life this increasingly prominent area of historical study, *Sex, Gender and Sexuality in Renaissance Italy* is ideal for students of Renaissance Italy and early modern gender and sexuality.

The Big Book of Amaro Oct 05 2022 An illustrated history, exploration, and celebration of the Italian liqueur everyone loves. This gorgeous guide teaches you everything you need to know about amaro, the delightfully complex and bittersweet Italian liqueur. Traditionally a digestif, it's also a popular ingredient in modern cocktails. The first part of the book is dedicated to the drink's creation and extraction processes, both traditional and contemporary. The second is a complete history of the beverage, from its origins in medieval alchemy to today's popular renaissance. Further chapters explore the liqueur's botanical profiles and natural properties, followed by a thorough buying guide with descriptions of bottles from Italy, Europe, and beyond. Finally, Zed showcases how best to use amaro behind the bar and in the kitchen, with recipes such as The Golden Mai Tai and Bitter Goat Cheese Risotto. A lovingly crafted tribute to a celebrated drink, The Big Book of Amaro is an eye-catching triumph that will delight anyone with a passion for amaro, mixology, food science, or all things Italian.

Cognitive Approaches to Ancient Religious Experience Jul 22 2021 For some time interest has been growing in a dialogue between modern scientific research into human cognition and research in the humanities. This ground-breaking volume focuses this dialogue on the religious experience of men and women in the ancient Greek and Roman worlds. Each chapter examines a particular historical problem arising from an ancient religious activity and the contributions range across a wide variety of both ancient contexts and sources, exploring and integrating literary, epigraphic, visual and archaeological evidence. In order to avoid a simple polarity between physical aspects (ritual) and mental aspects (belief) of religion, the contributors draw on theories of cognition as embodied, emergent, enactive and extended, accepting the complexity, multimodality and multicausality of human life. Through this interdisciplinary approach, the chapters open up new questions around and develop new insights into the physical, emotional, and cognitive aspects of ancient religions.

Native Wine Grapes of Italy Jul 02 2022 Mountainous terrain, volcanic soils, innumerable microclimates, and an ancient culture of winemaking influenced by Greeks, Phoenicians, and Romans make Italy the most diverse country in the world of wine. This diversity is reflected in the fact that Italy grows the largest number of native wine grapes known, amounting to more than a quarter of the world's commercial wine grape types. Ian D'Agata spent thirteen years interviewing producers, walking vineyards, studying available research, and tasting wines to create this authoritative guide to Italy's native grapes and their wines. Writing with great enthusiasm and deep knowledge, D'Agata discusses more than five hundred different native Italian grape varieties, from Aglianico to Zibibbo. D'Agata provides details about how wine grapes are identified and classified, what clones are available, which soils are ideal, and what genetic evidence tells us about a variety's parentage. He gives historical and anecdotal accounts of each grape variety and describes the characteristics of wines made from the grape. A regional list of varieties and a list of the best producers provide additional guidance. Comprehensive, thoroughly researched, and engaging, this book is the perfect companion for anyone who wants to know more about the vast enological treasures cultivated in Italy.

L'Analisi Linguistica e Letteraria 2015-1 Feb 14 2021 L'Analisi Linguistica e Letteraria è una rivista internazionale di linguistica e letteratura peer reviewed. Ha una prospettiva sia sincronica che diacronica e accoglie ricerche di natura teorica e applicata. Seguendo un orientamento spiccatamente interdisciplinare, si propone di approfondire la comprensione dei processi di analisi testuale in ambito letterario come anche in ambito linguistico. La rivista è organizzata in tre sezioni: la prima contiene saggi e articoli; la seconda presenta discussioni e analisi d'opera relative alle scienze linguistiche e letterarie; la terza sezione ospita recensioni e una rassegna di brevi schede bibliografiche riguardanti la linguistica generale e le linguistiche delle singole lingue (francese, inglese, russo, tedesco). La rivista pubblica regolarmente articoli in francese, inglese, italiano e tedesco, e occasionalmente anche in altre lingue: nel 2010, ad esempio, ha pubblicato un volume tematico interamente in russo.

Food Jan 16 2021 When did we first serve meals at regular hours? Why did we begin using individual plates and utensils to eat? When did "cuisine" become a concept and how did we come to judge food by its method of preparation, manner of consumption, and gastronomic merit? Food: A Culinary History explores culinary evolution and eating habits from prehistoric times to the present, offering surprising insights into our social and agricultural practices, religious beliefs, and most unreflected habits. The volume dispels myths such as the tale that

Marco Polo brought pasta to Europe from China, that the original recipe for chocolate contained chili instead of sugar, and more. As it builds its history, the text also reveals the dietary rules of the ancient Hebrews, the contributions of Arabic cookery to European cuisine, the table etiquette of the Middle Ages, and the evolution of beverage styles in early America. It concludes with a discussion on the McDonaldization of food and growing popularity of foreign foods today.
