Key Thinkers of the Radical Right Oct 02 2020 Since the start of the twenty-first century, the political mainstream has been shifting to the right. The liberal orthodoxy that took hold in the West as a reaction to the Second World War is breaking down. In Europe, populist political parties have pulled the mainstream in their direction; in America, a series of challenges to the Republican mainstream culminated in the 2016 election of Donald Trump. In *Key Thinkers of the Radical Right*, sixteen expert scholars explain sixteen thinkers, providing an introduction to their life and work, a guide to their thought, and an explanation of their work's reception. The chapters focus on thinkers who are widely read across the political right in both Europe and America, such as Julius Evola, Alain de Benoist, and Richard B. Spencer. Featuring classic, modern, and emerging thinkers, this selection provides a good representation of the intellectual right and avoids making political or value judgments. In an increasingly polarized political environment, *Key Thinkers of the Radical Right* offers a comprehensive and unbiased introduction to the thinkers who form the foundation of the radical right.

Transcending the Cold War Aug 12 2021 In 1989 and 1990 the map of Europe was transformed peacefully, without the wars which caused the other great ruptures of the international order in 1815, 1870, 1918, and 1945. What role did international summitry play in the denouement of the Cold War? Scholars have tended to focus on long-term systemic factors, Gorbachev's reform agenda, or the impact in 1989 of 'people power'. This major multinational study, based on archives from both sides of the 'Iron Curtain', adopts a novel perspective by exploring the contribution of international statecraft to the dissolution of Europe's bipolar order. This is done through the examination of key summit meetings from 1970 to 1990 across three phases - 'Thawing the Cold War', 'Living with the Cold War', and 'Transcending the Cold War' - and in three main strands: the superpowers and arms control, their triangular relationship with China, and the German question. The threads are drawn together in a sweeping analytical conclusion. *Transcending the Cold War* includes fascinating insights into key statesman such as Richard Nixon and Ronald Reagan, Leonid Brezhnev and Mikhail Gorbachev, Willy Brandt and Helmut Kohl, Zhou Enlai and Deng Xiaoping - both as thinkers about the international system and also practitioners of summit bargaining. Particular attention is devoted to the cultural dimension of summitry, as performative acts for the media and as engagement with 'the Other' across ideological divides. Written in lively prose, this volume is essential reading for those interested in modern history, contemporary politics, and international relations - addressing issues that still shape the world today.

Dental Materials Jan 25 2020 With this hands-on resource, you will learn the most current methods of placing -- or assisting in the placement -- of dental materials, and how to instruct patients in their maintenance. *Dental Materials* uses step-by-step procedures to show how to mix, use, and apply dental materials within the context of the patient's course of treatment. Expert authors Carol Hatrick, W. Stephan Eakle, and William F. Bird enhance this edition with four new chapters, along with coverage of newly approved materials and esthetic tools including the latest advances in bleaching and bonding. A new companion Evolve website lets you practice skills with challenging exercises! Procedure boxes include step-by-step instructions for common tasks. Procedural icons indicate specific guidelines or precautions that need to be followed for each procedure. End-of-chapter review questions help you assess your retention of material, with answers provided in an appendix. End-of-chapter case-based discussions provide a real-life application of material covered in the chapter. Clinical tips and precautions emphasize important information, advice, and warnings on the use of materials. Key terms are defined at the beginning of each chapter, bolded within the chapter, and defined in the glossary. Objectives help you focus on the information to gain from each chapter. Introductions provide an overview of what will be discussed in each chapter. Summary tables and boxes make it easy to find and review key concepts and information. Full-color photos and illustrations show dental materials and demonstrate step-by-step procedures, including new clinical photos of bleaching and bonding. New Dental Ceramics chapter addresses the growth in esthetic dentistry by discussing porcelain crowns, inlays, and veneers and the process of selecting the proper shade. New Dental Amalgam chapter discusses the use of metal - still the most commonly used material in restorative and corrective dentistry. New Casting Alloys, Solders, and Wrought Metal Alloys chapter breaks down specific types of combination metals and the procedures in which they are used. New Dental Implants chapter covers several different types of implants as well as how to instruct patients on hygiene and home care of their implant(s). The Materials Handling section reflects the new Infection Control Environment (ICE) standards and all approved ADA methods for the disposal of surplus materials. A companion Evolve website includes exercises to help you identify images and master procedures, plus competency skill sheets to assess your understanding.

The SAC Classification in Implant Dentistry Dec 24 2019 Implant dentistry is now an integral part of everyday dental practice; however, most dentists receive their education in implant dentistry after graduation, with little emphasis on the identification of the complexity and risks of treatment. Since 2003 the International Team for Implantology (ITI) has recommended the SAC Classification to categorize implant treatment procedures into three levels of difficulty-straightforward, advanced, and complex. In 2007 the ITI organized a conference to standardize the application of the SAC classification, the conclusions of which are presented in this volume. This invaluable resource will help clinicians identify treatment complexity and risk before treating a patient, thereby improving the predictability and success of their outcomes.

The Principles of Endodontics Feb 24 2020 The Principles of Endodontics, Third Edition is a contemporary and easy-to-read guide on why and how to carry out safe and effective endodontic treatment. Fully revised, the 'How to' sections provide current step-by-step guidance. With added colour photographs and line drawings, the book reflects the latest available material and equipment, and highlights interesting clinical cases. The Principles of Endodontics, Third Edition is the essential text for undergraduates and a useful reference for recent graduates as well as established clinicians who want to refresh their knowledge to continue their professional development.

The European Model of Agriculture Feb 06 2021 In order to meet the changing needs of the agricultural sector, the European Union has advocated a new 'European model of Agriculture' which will provide a competitive and diverse agricultural sector that is environmentally responsible and that uses Community funds wisely. In order to implement such a range of policies the EU will need to pass a large amount of legislation. This book sets out to analyze whether the legislative framework for this model is feasible and whether it can deliver these policy objectives. The timely analysis of the tension between the EU model and the global economy as supervised by the WTO, the emphasis on environmental protection, and the place of agriculture in the wider rural economy are all issues at the heart of the present debate. This book is the first to deal with the mid-term review of the CAP and is therefore essential reading for academics, practitioners and policy makers in the field.
