[You Can Do Anything](#) Jan 25 2022 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In YOU CAN DO ANYTHING, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why "telling your story" is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

I Can Give You Anything But Love Jul 07 2020 The long-awaited memoir from one of the most acclaimed radical writers in American literature. ?Described by the London Review of Books as one of “the most brilliant critics writing in America today,” Gary Indiana is a true radical whose caustic voice has by turns haunted and influenced the literary and artistic establishments. With I Can Give You Anything but Love, Gary Indiana has composed a literary, unabashedly wicked, and revealing montage of excursions into his life and work—from his early days growing up gay in rural New Hampshire to his escape to Haight-Ashbury in the post–summer-of-love era, the sweltering 1970s in Los Angeles, and ultimately his existence in New York in the 1980s as a bona fide downtown personality. Interspersed throughout his vivid recollections are present-day chapters set against the louche culture and raw sexuality of Cuba, where he has lived and worked occasionally for the past fifteen years. Connoisseurs will recognize in this—his most personal

book yet—the same mixture of humor and realism, philosophy and immediacy, that have long confused the definitions of genre applied to his writing. Vivid, atmospheric, revealing, and entertaining, this is an engrossing read and a serious contribution to the genres of gay and literary memoir.

Anything We Love Can Be Saved Oct 29 2019 In *Anything We Love Can Be Saved*, Alice Walker writes about her life as an activist, in a book rich in the belief that the world is saveable, if only we will act. Speaking from her heart on a wide range of topics--religion and the spirit, feminism and race, families and identity, politics and social change--Walker begins with a moving autobiographical essay in which she describes her own spiritual growth and roots in activism. She goes on to explore many important private and public issues: being a daughter and raising one, dreadlocks, banned books, civil rights, and gender communication. She writes about Zora Neale Hurston and Salman Rushdie and offers advice to Bill Clinton. Here is a wise woman's thoughts as she interacts with the world today, and an important portrait of an activist writer's life. NOTE: This edition does not include photographs.

At this Time and in this Place Nov 30 2019 This book champions vocation and calling as key elements of undergraduate education. It offers a historical and theoretical account of vocational reflection and discernment, as well as suggesting how these endeavors can be implemented through specific educational practices. Against the backdrop of the current national conversation about the purposes of higher education, it argues that the undergraduate years can provide a certain amount of relatively unfettered time, and a "free and ordered space," in which students can consider the kinds of lives to which they are being called. The book is divided into four parts; the first of these explores the broader context within which vocational reflection takes place (attending both to the current state of higher education and to broader cultural trends). The second part examines the contours of vocation from historical, theological, and philosophical perspectives, with particular attention tonarrative as a key factor in shaping (and accounting for) one's various callings. Part three considers the relationship between vocation and virtue, both of which encourage the cultivation of good habits with the goal of living a fulfilled and fulfilling life. The last part of the book explores vocational reflection beyond the classroom, suggesting that it can also be sustained through co-curricular activities, programs for community engagement, and attention to a campus's physical features. Concluding with an epilogue that summarizes that various pedagogies of vocation that are developed throughout the book, this book also suggests that vocation may itself serve as a kind of pedagogy by encouraging undergraduates to examine larger questions of meaning and purpose. *At This Time and In This Place* offers a compelling argument for vocational reflection and discernment in undergraduate education; as such, it represents a significant contribution to the emerging scholarly literature in this field.

They Can't Find Anything Wrong Jul 27 2019 A specialist in Stress Illness reveals how to identify and remedy this potentially serious health issue that too often goes undiagnosed. Every year, millions of people seek medical care for symptoms that diagnostic tests are unable to explain. Sent away frustrated, or thinking it's "all in their heads," the truth is that many of these people are ill because of hidden stresses. Dr. David Clarke has done pioneering work with thousands of these patients, often sent to him as a last resort. In *They Can't Find Anything Wrong*, he offers real solutions to put a stop to the stress illness epidemic. Dr. Clarke describes the major types of stress and explains steps for treatment with a range of effective techniques. Case histories that read like medical mysteries illustrate the concepts and make them easy to apply.

The First 20 Hours Jan 31 2020 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from

getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition—how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.
