Poverty, Politics, and Race Feb 09 2020 Poverty, Politics, and Race gives a true face to poverty, while knocking down stereotypes on race and the poor; and sheds light on how the politics of the past and present have magnified issues of race in America. The book also gives a personal look back at an important period in civil rights in America's history and sounds an alarm at the renewed and very open racial hatred that resurged with the election of the first African-American U.S. President. It takes a critical look at current events affecting the lives of average Americans through the prism of a Black woman who has experienced firsthand the effects of poverty, race, and the politics surrounding both issues. The book hopefully will help remove the blinders to a more honest discussion on the divisions in our country and ways we can begin to heal them.

Crazy Sep 30 2019 CRAZY A MEMOIR is a humorous, adventuresome romp about weed smuggling in the seventies and eighties. The author chronicles his early life in San Antonio and the influence of the groovy culture during his teen years. He then comically depicts his required military service as a "tie-dyed hippie army greens" and his determined attempts to stay out of Viet Nam. Lost and unsure about life following the related deaths of most of his friends, he later hitchhikes around Mexico and ends up attending college where he begins his career in weed smuggling. His entrepreneurial efforts in this area are humorously detailed in great detail. The book captures a slice of time, tying in political and cultural events with the author's concomitant psychological development during the hippie movement as well as his evolving career as a weed smuggler for the Cause.

System and Process in International Relations Jan 03 2020 System and Process (1957) broke the mould in political science by combining systems, game, and cybernetic concepts in its theoretical formulations. Since its publication, serious research in international relations has needed to respond to the bold hypotheses that matched the rules with type of system. Kaplan's life-long interest in finding an objective basis for moral judgments has its scholarly origins in an appendix of this classical book, which incorporated his understanding of philosophy, in particular, the philosophy of science. A second appendix on 'The Mechanisms of Regulation' explored the cybernetic and recursive nature of knowing.

A Hoser's Guide to Canadian History | Aug 22 2021 The great thing about being Canadian is simply this: we don't take ourselves too seriously, which works out pretty well because no one else on the planet takes us as seriously either. If you're reading this book, there's a good chance you're a Canadian. But what does that mean? It's not just the stereotypical nods, such as politeness and apologizing, but there's so much more! To be honest, you've probably taken part in (or at least talked about) hockey, poutine, curling, canoes, health care, snowshoeing, camping, beer, road work, Canadian Tire, Slurpees, moose, maple syrup, and Tim Hortons in the last 24 hours. "A Hoser's Guide to Canadian History" is your ticket to even more things "Canadian" that you may have heard about during your water-cooler discussions, online chats, or your seventeen-hour wait in the local emergency room. When you read this book, you'll discover new and exciting facts about Canada that simply weren't taught in school. As a History teacher, I found the need to spread the unvarnished truth of this great nation's past. People like "Eh" MacDonal, Tommy Douglas, and Pierre Trudeau all had a distinct impact on this great country of Canada, and part of their stories are included in these pages. Even less-famous folks who helped to shape Canadian history are mentioned: John Humphrey, Laura Secord, and Egerton Ryerson. (Yes, "Egerton" is a real name.) Canada has an exciting past, full of events that have brought us to where we are now. Like all countries, we have some things we'd like to forget, but most of those unpleasant moments happened because we had morons in Parliament. We don't want something that doesn't happen anymore. Canadians have no need to apologize for being nice, honest, and hard-working people. So, please enjoy this book, and if you don't, well, I'm sorry.

Which Way? | Sep 10 2020 For page samples, follow the link: <https://books.lidiastanton.com/whichway> This colourful and highly engaging resource is written for children as young as 4-5 years old but also those in Stage 2 of primary school (up to 9 years old) who continue to feel confused by letter and digit shape. A small group might become so discouraged that they avoid writing, or write very little, despite having great ideas and imaginations. They start doubting their ability to simply 'know' the correct way when writing b/d, p/q, 6/9, s/z, 5/S, S/3, etc. Most teachers and parents are very good at playing down the reversals and encouraging the child to have another go. They say, "It's fine, it's still good writing. I love what you've written here." Yet after many attempts and after so many teacher corrections on the page, the child begins to think, "This writing might not be for me after all". Those with dyslexia will have additional phonological difficulties to manage.

alongside poor memory for graphic shapes. This workbook is for children who can trace well at speed, appear to have developed adequate motor memory in their fingers, yet struggle to remember 'which' the letter or digit. It is very likely that they will be ready to integrate this type of linear visual-spatial at a later time. For now, they have no real-life representation, or model, of a handful of graphic shapes in their brains, and this, in turn, can affect their confidence in writing independently. This resource offers practical long-term 'tricks' that will trigger the child's memory at the right moment. It adopts a complementary to traditional letter formation teaching to bridge the gap between children who are proficient graphic writers and those whose brains make different sense of graphic information. Many children with dyslexia and dyscalculia particularly benefit from completing the workbook. How to use the resource The child doesn't need to go through the entire book. Choose sections that are relevant to their needs. Younger children (aged 4-6) certainly need assistance when working with the resource, although older ones will no doubt choose to work independently, showing their practised strategies and completed activities to teachers and parents. It is recommended that section 7 (Use your whole body) is attempted with the help of an older helper or adult. There are more than one method to help distinguish between b/d/p and s/z in this workbook. Introduce the different methods one method at a time, evaluate the child's progress, and decide whether there is a need to move on to the next. Some children are more practical than visual - the 'Use your hands' strategy might be sufficient for them. Other children might enjoy more visual strategies in sections 4, 5 and 6. In my experience, section 7 (Use your whole body) works well with children who need to 'experience' concepts in a multi-sensory manner. Pay attention to the child's initial response to a particular method. It will guide you along. You can mix and match strategies to suit individual children. Children who don't confuse b/d as much but struggle with p/q. Some activities can be completed independently of the section the child is currently working through. For example, Activity 7 can be attempted after completing the 'Use your hands' section. Flick through the book to decide which activities appear to be suitable to the child's current progress.
