Roller coasters towering taller than a certain height are terrifying for many individuals but it would be

One element alone may not make a ride terrifying but the sum of all of its parts does. What factors make a roller coaster terrifying? Height, speed, inversions, backwards segments, unique track elements, darkness, and unexpected surprises all contribute to making your head spin and your knees tremble. Where are the most terrifying roller coasters found? Who designs them? Which park builds the craziest rides? Find out by reading *The 50 Most Terrifying Roller Coasters Ever Built!* The second coaster book from Nick Weisenberger, author of *Coasters 101: An Engineer's Guide to Roller Coaster Design* which is the most in-depth look at how a roller coasters are designed, from concept through construction.
