blood flow restriction exercise
considerations of methodology Oct 31 2019
may 15 2019 introduction blood flow restriction
bfr is a training method partially restricting
arterial inflow and fully restricting venous
outflow in working musculature during exercise
scott et al 2015 performing exercise with
reduced blood flow achieved by restriction of the
vasculature proximal to the muscle dates back to
dr yoshiaki sato in japan where it was known as
rapid arterial occlusion evaluation race scale for
stroke Mar 05 2020 the higher the race score
the higher the probability of having a large

vessel occlusion a cut off point of race 4 allows detecting 80 of patients with a large vessel occlusion however we have to assume that about 25 of patients above this score will have a hemorrhagic stroke and 5 a mimic stroke
