A Day-by-Day Chronicle of the 2013-2016 Ebola Outbreak Nov 10 2020 This powerful history describes the daily progression of the Ebola outbreak that swept across West Africa and struck Europe and America from December 2013 to June 2016. A case study on a massive scale, it follows the narratives of numerous patients as well as the journey of physicians and scientists from discovery to action and from tracking to containment. The unfolding story reveals ever-shifting complexities such as the varied paths the infection took from country to country, the multiple responses of community members, and the occurrence of flare-ups when the outbreak was seemingly over. The book's finely-documented present-tense reporting records key facts, events, and observations, including: Routes of Ebola transmission, incubation, symptoms, short- and long-term effects on survivors Early attempts to understand and contain the virus and curb practices contributing to its spread Medical, governmental, and public responses, from local education programs to global efforts Communication and conflict between healthcare workers and communities Social and economic outcomes of Ebola in the affected nations Ebola remains incurable, although a vaccine is now available. For members of the medical community, public health officials, medical historians, scholarly professionals, and interested laypeople, *A Day-by-Day Chronicle of the 2013-2016 Ebola Outbreak* makes starkly clear what we can learn from these events not only for future outbreaks of Ebola, but also for the emergence of as-yet unknown diseases.

A Hospital for Ashe County Jun 05 2020 When Ashe County Memorial Hospital opened in November 1941, it was the realization of a dream for the poor, sparsely populated county in the mountains of northwestern North Carolina. Building a hospital is a major undertaking for any community at any time. Accomplishing this in the waning days of the Great Depression and on the brink of World War II, while scant local resources were taxed by catastrophic floods and severe snows, was a remarkable feat of community organization. This is the story of the generations of supporters, doctors, nurses, emergency personnel and others whose lives are interwoven with regional health care and the planning, building and operation of (the "new") Ashe Memorial Hospital. This legacy, brought to life through 114 photographs and personal interviews with 97 individuals, traces the development of health care in a remote Appalachian community, from the days of folk remedies and midwives, to horseback doctors and early infirmaries, to the technological advances and outreach efforts of today's Ashe Memorial Hospital.

What Went Wrong Aug 08 2020 *What Went Wrong: Twenty Years of Airline Accidents (1996 to 2015)*, examines the defining accidents of the period. From the human, procedural and mechanical failures which caused them, as well as some where the final conclusion remains undefined or disputed. To the positive changes they inspired on all those involved and the industry at large, which ultimately helped to make airline transport safer for the world's travelling public. *What Went Wrong's* greater depth and enhanced insight of the involved issues and investigative process better illustrates—than other publications,

documentaries or media coverage—each unfortunate event for the aviation aficionado, enthusiast and the everyday reader alike. **Bosnia and Herzegovina** Mar 03 2020 This 2015 Article IV Consultation highlights that the economic growth in Bosnia and Herzegovina is expected to rebound to more than 2 percent in 2015, as economic activity is picking up in Europe. Industrial activity and exports have been gathering momentum. Domestic political risks weigh heavily on the outlook. The risk of policy slippages and delays in implementation of the Reform Agenda is significant given the complex political set up and the strong opposition to reforms from vested interests. On the external side, risks are more balanced, as stagnation in Europe, possible financial market strains, or geopolitical tensions could dampen growth, while a faster recovery in Europe or the resolution of trade issues with the European Union could spur exports.

Ukraine in the Crossfire Jan 13 2021 Ukraine is embroiled in a bloody civil war. Both sides stand accused of collaborating with fascists, of committing war crimes, of serving foreign interests. This proxy-war between Russia and the West was accompanied by a fierce information war. This book separates fact from fiction with extensive and reliable documentation. While remaining critical of Russia and the Donbass rebellion, De Ploeg demonstrates that many of the recent disasters can be traced to Ukrainian ultranationalists, pro-western political elites and their European and North-American backers. *Ukraine in the Crossfire* tackles the importance of ultranationalist violence during and after the EuroMaidan movement, and documents how many of these groups are heirs to former nazi-collaborators. It shows how the Ukrainian state has seized on the ultranationalist war-rhetoric to serve its own agenda, clamping down on civil liberties on a scale unprecedented since Ukrainian independence. De Ploeg argues that Kiev itself has been the biggest obstacle to peace in Donbass, with multiple leaks suggesting that US officials are pushing for a pro-war line in Ukraine. With the nation's eyes turned towards Russia, the EU and IMF have successfully pressured Ukraine into adopting far-reaching austerity programs, while oligarchic looting of state assets and massive tax-avoidance facilitated by western states continue unabated. De Ploeg documents the local roots of the Donbass rebellion, the overwhelming popularity of Crimea's secession, and shows that support for Ukraine's pro-western turn remains far from unanimous, with large swathes of Ukraine's Russophone population opting out of the political process. Nevertheless, De Ploeg argues, the pro-Western and pro-Russian camps are often similar: neoliberal, authoritarian, nationalist and heavily dependent on foreign support. In a wider exploration of Russo-Western relations, he examines similarities between the contemporary Russian state and its NATO counterparts, showing how the two power blocs have collaborated in some of their worst violent excesses. A far cry from civilizational or ideological clashes, De Ploeg argues that the current tensions flow from NATO's military dominance and aggressive posture, both globally and within eastern Europe, where Russia seeks to preserve the status-quo. Packed with shocking facts, deftly moving from the local to the international, from the historical to the recent; De Ploeg connects the dots.

Ukraine Nov 30 2019 This paper discusses Ukraine's Request for Extended Arrangement Under the Extended Fund Facility (EFF) and Cancellation of Stand-by Arrangement (SBA). Despite tangible progress under the SBA, the crisis in Ukraine has increased its balance of payments and adjustment needs beyond what can be achieved under the current program. The authorities' new four-year IMF-supported program aims to decisively address these challenges. The program lays out a strategy to restore financial and economic stability and resolve long-standing structural obstacles to growth. In view of Ukraine's large external financing needs and the authorities' strong policy commitments, the IMF staff supports approval of Ukraine's four-year Extended Arrangement under the EFF with access equivalent to SDR 12.348 billion.

UKIP Jul 27 2019 The UK Independence Party (Ukip) is the most significant new force in British politics for a generation. Under the leadership of Nigel Farage, the party has enjoyed a remarkable rise, winning the 2014 European Parliament elections as well as two parliamentary by-elections, and attracting mainstream defectors to achieve major party status. By the time of the 2015 general election, Farage and Ukip stood on the threshold of becoming a major force at Westminster. This account is a must-read for anyone interested in the inside story of Ukip's quest to change British politics during one of the most unpredictable and dramatic elections in recent history. Based on unprecedented access to the party and its key players, the book pulls back the curtain on one of the most intriguing campaigns in living memory. It includes behind the scenes observations from the campaign trail and more than one hundred interviews - with leading Ukip insiders such as Nigel Farage, Douglas Carswell, and Mark Reckless, as well as major donors, strategists, and figures from across the political landscape as they grappled with Ukip's rise. Matthew Goodwin and Caitlin Milazzo reveal what really happened during the 2015 election campaign and in the by-elections and defections which preceded it, providing detailed accounts of the critical moments that shaped both the election itself and British politics more widely. The book also makes extensive use of British Election Study data from over five decades to answer important questions about the rise of Ukip and what it signifies. Who voted for Ukip and why? How are political loyalties in Britain changing over time? What are the deeper currents that have made Ukip's rise possible and will continue to shape its future? And what does the party's campaign for power reveal about the current evolution of British politics and society? UKIP takes readers inside the campaign, telling for the first time the exciting inside story of a new party attempting to redraw the map of British politics.

Ethiopia's agrifood system: Past trends, present challenges, and future scenarios Oct 29 2019 Ethiopia has experienced impressive agricultural growth and poverty reduction, stemming in part from substantial public investments in agriculture. Yet, the agriculture sector now faces increasing land and water constraints along with other challenges to growth. Ethiopia's Agrifood System: Past Trends, Present Challenges, and Future Scenarios presents a forward-looking analysis of Ethiopia's agrifood system in the context of a rapidly changing economy. Growth in the agriculture sector remains essential to continued poverty reduction in Ethiopia and will depend on sustained investment in the agrifood system, especially private sector investment. Many of the policies for a successful agricultural and rural development strategy for Ethiopia are relevant for other African countries, as well. Ethiopia's Agrifood System should be a valuable resource for policymakers, development specialists,

and others concerned with economic development in Africa south of the Sahara.

Iraq in the Twenty-First Century Mar 27 2022 Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin that accompanied the Iraq war was an absolute catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable.

Digital Online Culture, Identity, and Schooling in the Twenty-First Century Sep 28 2019 Digital Online Culture, Identity and Schooling in the Twenty-First Century provides a cultural, ideological critique of identity construction in the context of virtualization. Kimberly Rosenfeld explores the growing number of people who no longer reside in one physical reality but live, work, and play in multiple realities. Rosenfeld's critique of neo-liberal practices in the digital environment brings to light the on-going hegemonic and counter-hegemonic battles over control of education in the digital age. Rosenfeld draws conclusions for empowering the population through schooling, and how it should understand, respond to, and help individuals live out the information revolution.

Political Craps Jun 17 2021 We the people of the United States, in Order to form a more perfect Union, establish Justice, insure domestic tranquillity, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do hereby vow to actively participate as informed citizens, holding ourselves and our representatives accountable, in the conduct of our nation's affairs to serve all generations now and in the future. Obamacare. IRS Scandal. NSA

& Privacy. BridgeGate... Anthony Weiner. Chris Christie. Tom Ford. Bob Filner... Shutdown vs Meltdown. Gridlock, TeaParty. Rep. vs. Dem... Deficits. Lobbyists. Unemployment. Opinion Polls... They're all here and it's all up to you! Enough is enough and the time for action is now. Everyone says they're fed up with the partisan rancor, inefficient government, and the "blame games." People cry for leadership and apathetically accept the status quo. In Political CRAPS. Author Tom Ufert lays it all out as a former political insider and holds both politicians & voters accountable. He reminds us all that with freedom comes responsibility and change takes action. "A Government by the people, for the people."

Handbook of Research on Narrative Interactions Apr 03 2020 Our understanding of the concept of narrative has undergone a significant transformation over time, particularly today as new communication technologies are developed and popularized. As new narrative genres are born and old ones undergo great change by the minute, a thorough understanding can shed light on which storytelling elements work best in what format. That deep understanding can then help build strong, satisfying stories. The Handbook of Research on Narrative Interactions is an essential publication that examines the relationships between types of narratives in a shifting and widening scope of storytelling forms. While highlighting a wide range of topics including contemporary culture, advertising, and transmedia storytelling, this book is ideally designed for media professionals, content creators, advertisers, entrepreneurs, researchers, academicians, and students.

Indian Ocean Futures Jan 25 2022 Indian Ocean studies, which once lagged behind studies of the Atlantic and the Pacific, is an important emerging academic field which has come into its own. In the next fifty years, the Indian Ocean Region will become very significant as a result of enormous demographic changes. What was the Ocean of the South is rapidly becoming the Ocean of the Centre, the Ocean of the Future. Curtin University, Western Australia, has a long and distinguished history of engagement with the Indian Ocean region and with Indian Ocean Studies, and its Australia-Asia-Pacific Institute of Curtin University continues to maintain a focus on the Indian Ocean -past, present and future. This book examines a number of themes emerging from its 2014 Conference entitled "Indian Ocean Futures", which attracted some of the best Indian Ocean region scholars. The conference connected humanities, social sciences and scientific disciplines; this book collects some of the preeminent works focused on geo-strategic, cultural, environmental security and human security themes. The book is also an important contribution to the building of academic diplomacy in the region – that is to say, it contributes to region-building by creating epistemic communities and networks between government, the private sector, and academia throughout the region. Through the pursuit of academic diplomacy, academics are capable of pursuing research goals which enhance governmental, business, and civil society objectives of the day. This book was previously published as a special issue of the Journal of the Indian Ocean Region.

Trans New Wave Cinema Oct 10 2020 This book presents a critical cultural study of the Trans New Wave as a cinematic genre and explores its emergence in the twenty-first century. Drawing on a diverse range of texts, the cultural, social, aesthetic and ethical implications of the genre are placed within the context of rapidly changing understandings of gender diversity. From the cinematic borderlands of independent film festivals to wider public recognition via digital technologies, the genre encompasses a diverse range of texts from short films, documentaries, experimental films, to feature films and narratives that range across life histories, narratives and themes. The book presents transliteracy as an original theoretical approach to reading film representations of the Trans New Wave, and combines it with a new theoretical concept of cinematic ethnogenesis to investigate how the genre emerged from specific communities and the reciprocal interaction of audiences and texts. This interdisciplinary volume engages with contemporary issues of gender diversity, transgender studies, screen and media studies and film festival studies, and as such will be of great interest to scholars working in these fields and in media and cultural studies more generally.

Libya's Fragmentation Nov 03 2022 After the overthrow of the Qadhafi regime in 2011, Libya witnessed a dramatic breakdown of centralized power. Countless local factions carved up the country into a patchwork of spheres of influence. Almost no nationwide or even regional organizations emerged, and no national institutions survived the turbulent descent into renewed civil war. Only the leader of one armed coalition, Khalifa Haftar, managed to overcome competitors and centralize authority over eastern Libya. But tenacious resistance from armed groups in western Libya blocked Haftar's attempt to seize power in the capital Tripoli. Rarely does political fragmentation occur as radically as in Libya, where it has been the primary obstacle to the re-establishment of central authority. This book analyzes the forces that have shaped the country's trajectory since 2011. Confounding widely held assumptions about the role of Libya's tribes in the revolution, Wolfram Lacher shows how war transformed local communities and explains why Khalifa Haftar has been able to consolidate his sway over the northeast. Based on hundreds of interviews with key actors in the conflict, Lacher advances an approach to the study of civil wars that places the transformation of social ties at the centre of analysis.

World-wide workforce I May 29 2022 This first edition of 'World-wide workforce' provides you with a comprehensive analysis of recruiting practices for the countries: Brazil, Canada, China, Costa Rica, Denmark, France, Germany, Italy, Mexico, Panama, Peru, Russia, South Africa, South Korea, Sweden, the United Arab Emirates and the United Kingdom. Simply because domestic recruiting conventions often differ from those from elsewhere. This book provides an easy-to-use reference for those aiming at a cross-border career.

Vote Buying in Indonesia Jan 31 2020 Muhtadi's analysis of vote-buying in post-democratization Indonesia is original, profound, subtle, nuanced, and convincing as well as beautifully organized and well written. Equally important, its imaginative policy prescriptions will be widely read and cited as a significant contribution to the literature of comparative electoral politics.

—William Liddle, Ohio State University, USA This book presents a pathbreaking analysis of vote-buying in Indonesia. Drawing on a stunning array of evidence, Muhtadi reveals the mechanics, patterns and effects of vote-buying with unprecedented clarity. [Title] is a must read for anyone interested in Indonesian politics or in the comparative politics of clientelism. —Edward Aspinall, Australian National University, Australia This book contains a trove of interesting research questions, a novel theoretical contribution, impressive empirical work, and a deep and nuanced understanding of the Indonesian case. —Allen Hicken, University of Michigan, USA This book is open access under a CC BY 4.0 license. This book investigates the impact of vote buying on the accountability of democratic institutions and policy representation in newly democratic countries, with a focus on Indonesia. In doing so, the book presents a wide-ranging study of the dynamics of vote buying in Indonesia's young democracy, exploring the nature, extent, determinants, targeting and effectiveness of this practice. It addresses these central issues in the context of comparative studies of vote buying, arguing that although party loyalists are disproportionately targeted in vote buying efforts, in total numbers—given the relatively small number of party loyalists in Indonesia—vote buying hits more uncommitted voters. It also demonstrates that the effectiveness of vote buying on vote choice is in the 10 percent range, which is sufficient for many candidates to secure a seat and thus explains why they still engage in vote buying despite high levels of leakage. Burhanuddin Muhtadi is a lecturer at State Islamic University, Jakarta. He is also an

executive director of Indonesian Political Indicator and Director of Public Affairs at Indonesian Survey Institute (LSI). He has published his articles in numerous scholarly journals.--

From Cold War To Hot Peace Jul 19 2021 NEW YORK TIMES BESTSELLER | From the diplomat Putin wants to interrogate—and has banned from Russia—comes a revelatory inside account of US-Russia relations across the three decades following the Cold War. In 2008, when Michael McFaul was asked to leave his perch at Stanford and join an unlikely presidential campaign, he had no idea that he would find himself at the beating heart of one of today's most contentious and consequential international relationships. As President Barack Obama's adviser on Russian affairs, McFaul helped craft the United States' policy known as "reset" that fostered new and unprecedented collaboration between the two countries. And then, as US ambassador to Russia from 2012 to 2014, he had a front-row seat when this fleeting, hopeful moment crumbled with Vladimir Putin's return to the presidency. This riveting inside account combines history and memoir to tell the full story of US-Russia relations from the fall of the Soviet Union to the new rise of the hostile, paranoid Russian president. From the first days of McFaul's ambassadorship, the Kremlin actively sought to discredit and undermine him, hassling him with tactics that included dispatching protesters to his front gates, slandering him on state media, and tightly surveilling him, his staff, and his family. *From Cold War to Hot Peace* is an essential account of the most consequential global confrontation of our time.

How Power Shapes Energy Transitions in Southeast Asia Jun 29 2022 An understanding of the role of energy-related governance systems and the conditions required for a shift towards renewables in developing countries is urgently needed in order to tap into the global potential of low-carbon development. Although renewable energy sources have become technically feasible and economically viable, social and political factors continue to persist as the most critical obstacles for their dissemination. *How Power Shapes Energy Transitions in Southeast Asia* conceptualizes power for the field of sustainable energy governance. Based on empirical findings from the Philippines and Indonesia, the book develops an analytical approach that incorporates power theory into a multi-level governance framework. The book begins with a profound background on renewable energy development around the world and presents major trends in development cooperation. A power-based multi-level governance approach is introduced that is rooted in development thinking. Examining how coordination and power relations shape the development and dissemination of renewable energy technologies, the book also shows how decentralization affects low carbon development in emerging economies. Sparking debate on the ways in which energy transitions can be triggered and sustained in developing countries, this book will be of great interest to students and scholars of renewable energy development and environmental politics and governance as well as practitioners in development cooperation.

America the Strong Aug 27 2019 Summarizes the five fundamental principles of conservatism, discussing why they are worth preserving and the role they have played in the formation of the United States.

Milton Friedman and Economic Debate in the United States, 1932–1972, Volume 1 May 05 2020 Milton Friedman is widely recognized as one of the most influential economists of the twentieth century. Yet no previous study has distilled Friedman's vast body of writings into an authoritative account of his research, his policy views, and his interventions in public debate. With this ambitious new work, Edward Nelson closes the gap: *Milton Friedman and Economic Debate in the United States* is the defining narrative on the famed economist, the first to grapple comprehensively with Friedman's research output, economic framework, and legacy. This two-volume account provides a foundational introduction to Friedman's role in several major economic debates that took place in the United States between 1932 and 1972. The first volume, which takes the story through 1960, covers the period in which Friedman began and developed his research on monetary policy. It traces Friedman's thinking from his professional beginnings in the 1930s as a combative young microeconomist, to his wartime years on the staff of the US

Treasury, and his emergence in the postwar period as a leading proponent of monetary policy. The second volume covers the years between 1960 and 1972— years that saw the publication of Friedman and Anna Schwartz's *Monetary History of the United States*. The book also covers Friedman's involvement in a number of debates in the 1960s and 1970s, on topics such as unemployment, inflation, consumer protection, and the environment. As a fellow monetary economist, Nelson writes from a unique vantage point, drawing on both his own expertise in monetary analysis and his deep familiarity with Friedman's writings. Using extensive documentation, the book weaves together Friedman's research contributions and his engagement in public debate, providing an unparalleled analysis of Friedman's views on the economic developments of his day.
